At a glance:

- **Secure data transmission**
  from the printers to the Leibinger® Connect platform via the secure cloud-based Microsoft Azure platform service with regional data storage in the designated jurisdiction

- **Stable connection**
  between the printers and Leibinger® Connect via local company networks or an additional LTE option, eliminating the need for the company's own network

- **Location and time-independent access**
  via any smartphone, tablet, laptop or desktop PC. Made easy via URL and a user-friendly interface with responsive design

- **Intelligent monitoring and visualization**
  of all printers and relevant data

- **Alarm center**
  via individually configurable notifications for consumables to be refilled, printer messages and upcoming maintenance via dashboard and e-mail

- **Precise and fast remote support**
  through secure data transmission to Leibinger service partners

---

Are you already using Leibinger printers?
Leibinger® Connect Services can easily be used with your current Leibinger CIJ printer models**. Existing printers can also be retrofitted quickly and easily – and networked with the compact Leibinger Connect Box.
*Exception: Entry Line (JET One, JET1neo)

Are you interested in a complete package of networked printers?
Order your new Leibinger printer with „Connect Package" and get started now.

It's this easy:

1 CONNECT
Connect your Leibinger printer to the Internet using the Leibinger® Connect Box.

2 LOG IN
Log in for free at
connect.leibinger-group.com
and simply follow the steps.

3 GET STARTED
You can use the free Leibinger® Connect Services immediately and experience the smart way to handle your coding and marking tasks – reliably, securely and right on target.

Data protection:
Your data belongs to you. That's why Leibinger only works with providers with the highest standards of data protection and security when processing them. The Leibinger® Connect architecture is designed in compliance with the latest security standards. Data is transmitted in encrypted form and personal data is stored in accordance with the high standards of the General Data Protection Regulation (GDPR), Europe´s data privacy and security law. The data centers are subject to European data protection law.

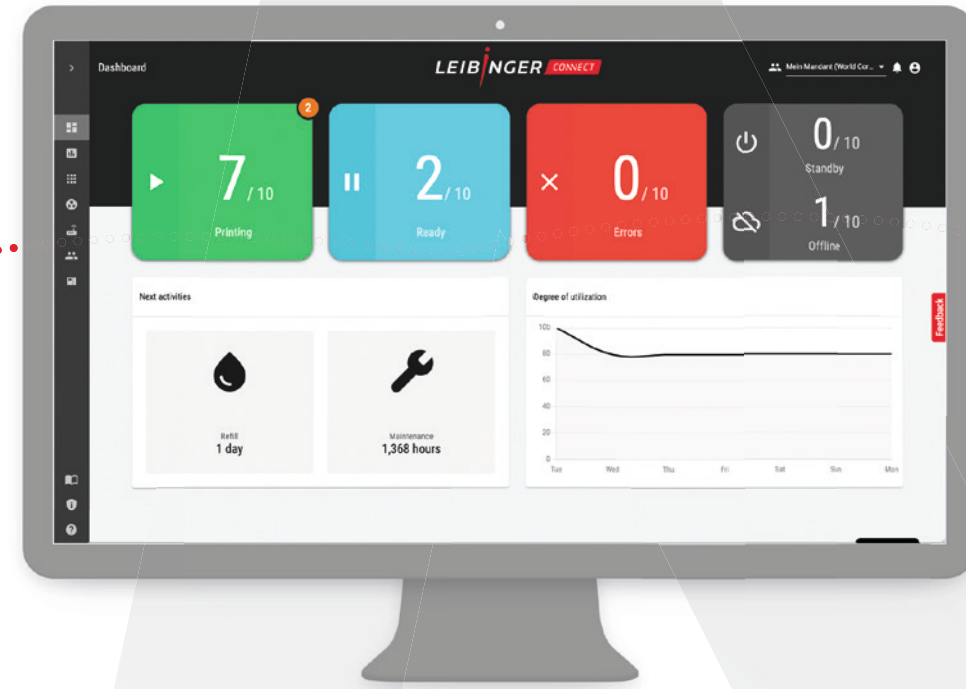

LEIB**I**NGER
CONNECT

CODING & MARKING
HAS NEVER BEEN SMARTER.

Manage your coding and marking tasks faster, more easily and more securely. Leibinger® Connect is your access to a better overview, improved planning and optimized productivity.

Tap the full potential of your Leibinger coding and marking systems with Leibinger® Connect – our digital services – independently of time and place.

Remote-Support*

**Establishes a meaningful foundation for efficient troubleshooting.**

Sound advice is just a click away. Leibinger® Connect opens up a new dimension in support: based on accurate and meaningful data in many cases, help can be provided remotely to get your Leibinger printer back up and running immediately.

This is based on data which, at your request, can be made available to your expert authorized Leibinger service partner via the secure, cloud-based system. It provides an initial, precise fault diagnosis without any delays. He or she only comes when an on-site service visit is really necessary. And you save time and money.

OUR TECHNOLOGY –
YOUR COST ADVANTAGE

• Rectify problems directly
• Reduce downtime to a minimum
• Avoid costs for service calls

* This service depends on agreements with your local
   Leibinger service partner.

PRODUCTION INTERRUPTIONS?
REJECTS? ALL A THING OF THE PAST.

Task planning

A central overview of all pending tasks and early notification support proactive production planning.

The Leibinger® Connect platform's user-friendly dashboard provides you with a quick overview of which activities are needed to be carried out next to keep your production running smoothly and non-stop: whether missing printer materials, important error messages or maintenance that is due. And to ensure that nothing, but nothing at all, is overlooked, the early warning system sends individually configurable messages by e-mail. So that you always have your daily coding and marking tasks under control.

OUR TECHNOLOGY –
YOUR EFFICIENCY

• Schedule service appointments in time
• Refill consumables on time
• Guarantee error-free operation

Data
Transparency

Harness your valuable printer data to increase your output.

You'll have centralized access to your valuable printer data. Easy to understand. Easily accessible. The cloud-based Leibinger® Connect platform allows you to clearly display the performance of different printers, production lines or an entire production operation – and compare it using meaningful key figures such as availability and utilization rates. Via URL at any time, anywhere and with any end device. In the various tabs, you can see all the printers connected in the system, including detailed views of the respective devices and jobs. Evaluating this data provides important approaches for optimizing processes to increase efficiency.

OUR TECHNOLOGY –
YOUR PRODUCTIVITY

• Uncover potential for increasing productivity
• Achieve maximum printer performance
• Increase output
